Career Platform – Complete Project Dataset

Short 4-page version containing the essential project information and dataset structure.

1. Problem Statement

Students and freshers struggle to find genuine jobs and internships because opportunities are scattered, outdated, closed, or misleading. They also struggle to tailor their existing resumes to a specific job description, reducing their chances of presenting a relevant application.

2. Solution

A single trusted platform for verified jobs and internships, combined with an AI Resume Analyzer. The user provides an existing resume and a job description. The system gives a prototype ATS-style match score, recommendations, and a tailored resume using only information already present in the original resume. It must not invent skills, certifications, projects, education, or experience.

3. Users

- College students searching for internships
- Freshers searching for entry-level jobs
- Entry-level job seekers who need resume guidance

4. Core Message

Find genuine opportunities. Build a resume that matches the role. Apply with confidence.

5. Main Features

Feature	Purpose
Verified Jobs	Show job opportunities linked to reliable/official sources.
Verified Internships	Show internship opportunities and their details.
Live / Closed	Separate active opportunities from applications that have ended.
Resume Analyzer	Compare the user's existing resume with a specific job description.
ATS / Match Score	Show a prototype compatibility score.
Recommendations	Explain missing or improvable areas.
Resume Tailoring	Improve relevance without adding false qualifications.
AI Chatbot	Clarify job, internship, resume, and career-related doubts.
Profile	Store basic user and resume information.

Main Workflow

User → Resume → Job Description → Skill Comparison → Matching Skills + Missing Skills → Match % / ATS-style Score → Recommendations → Tailored Resume

6. Career Opportunity Dataset – Official-Source Snapshot

These are the essential records from the combined dataset. Current application status can change and must be rechecked before showing an item as Live.

ID	Type	Company	Role / Opportunity	Location
GOO-001	Internship	Google	Student Researcher, 2026	Bengaluru
GOO-002	Internship	Google	Software Engineering PhD Intern, Summer 2026	Bengaluru / Hyderabad
GOO-003	Internship	Google	Silicon Engineering Intern, PhD, Summer 2026	Bengaluru / Hyderabad
GOO-004	Job	Google	Silicon Engineer, University Graduate, 2026	Bengaluru
GOO-005	Job	Google	Network Implementation Engineer, University Graduate	Bengaluru
GOO-006	Job	Google	Network Operations Residency Program, University Graduate	India
IBM-001	Internship	IBM	IBM Internship Programs	India / Global
IBM-002	Job	IBM	Entry-Level Careers	India / Global
IBM-003	Job	IBM	Data Scientist	Multiple locations
IBM-004	Job	IBM	Data Analyst	Multiple locations
IBM-005	Job	IBM	Data Architect	Multiple locations
IBM-006	Internship	IBM	Internship Search	India
MS-001	Internship	Microsoft	Global University Internships	India / Global
MS-002	Internship	Microsoft	Discovery Program	Check regional availability
MS-003	Job	Microsoft	Technical Customer Success Account Manager	Gurgaon
MS-004	Job	Microsoft	Technical, Cloud, Product and Support Careers	India

Official Source Categories

Company	Official Career Source Used
Google	Google Careers – India, student, internship and early-career listings
IBM	IBM Careers – Internships, Entry-Level Careers and Data & Analytics
Microsoft	Microsoft Careers – India and Early in Profession / Students

Live / Closed Rule

Verified does not automatically mean currently open. Store the official source and application URL, check the deadline or page status, show active applications as Live, and move ended applications to Closed.

7. Core Database Structure

Data Category	Important Fields
Students / Users	User_ID, Name, Email, Education, Skills, Profile Details
Jobs	Job_ID, Company, Role, Description, Required Skills, Location, Eligibility, Deadline, Apply Link, Status
Internships	Internship_ID, Company, Role, Description, Required Skills, Location, Duration, Eligibility, Deadline, Apply Link, Status
Resumes	Resume_ID, User_ID, Resume File/Text, Extracted Skills, Upload Date
Job Skills	Job_ID, Required Skill, Priority/Weight
Saved Jobs	User_ID, Opportunity_ID, Saved Date
Applications	User_ID, Opportunity_ID, Application Status, Applied Date
Notifications	User_ID, Message, Type, Created Date, Read Status
Courses	Course_ID, Course Name, Skill/Category, Link
Interview Questions	Question_ID, Role/Category, Question, Difficulty

8. Resume Analysis Dataset Fields

Field	Purpose
Candidate_ID / User_ID	Identify the user or demo candidate
Target_Role	Role being analyzed
Resume_Skills	Skills extracted from the existing resume
Required_Skills	Skills required by the target role/job description
Matching_Skills	Skills present in both
Missing_Skills	Required skills not found
Match_Percentage	Prototype skill-overlap result
ATS_Score	Prototype ATS-style score
Recommendation	Guidance on what to improve

9. Demo Resume-Matching Records

ID	Role	Match	ATS	Recommendation
C001	Data Analyst	50%	72	Improve skills
C002	Frontend Developer	83%	88	Strong match
C003	Backend Developer	83%	91	Strong match
C004	Data Scientist	86%	90	Strong match
C005	IoT Developer	86%	84	Strong match

Note: These candidate records and scores are synthetic/demo data used for development and testing, not real student records or validated ATS benchmarks.

10. Dashboard & Analytics

Dashboard Element	Purpose
ATS Score Card / Gauge	Show the resume's prototype ATS-style score.
Skill Match Chart	Compare matching and missing skills.
Missing Skills View	Highlight skills required by the target role but absent from the resume.
Jobs / Internships Cards	Display opportunity title, company, location, status and details.
Live / Closed Tabs	Organize opportunities by application status.
Saved Jobs	Show opportunities bookmarked by the user.
Applications	Track user application records.

11. Recommended Technology Plan

Layer	Technology
Frontend	HTML, CSS, JavaScript
Backend	Python Flask or FastAPI
Database	MySQL / SQLite / MongoDB
Data Processing	Python, Pandas, NLP
Matching Logic	Skill extraction, TF-IDF / cosine similarity or rule-based matching
AI Layer	Resume analysis, recommendations, and chatbot
Visualization	Dashboard cards and charts

12. Important Data Rules

• Only present an opportunity as verified when you have a reliable source trail, preferably an official company/organization career or application page.

• Do not permanently hard-code opportunity status as Live; application pages and deadlines change.

• Move opportunities to Closed when applications end.

• Do not invent skills, certifications, projects, education, achievements, or experience while tailoring a resume.

• Clearly separate synthetic/demo data from real user data.

• Treat ATS scores in the prototype as implementation outputs, not as universally valid ATS scores, unless you later define and validate a scoring methodology.

13. Final Project Summary

This platform solves two connected problems: discovering trustworthy career opportunities and improving the relevance of a student's existing resume for a specific role. The final system combines verified job/internship data, a user profile, resume analysis, skill comparison, recommendations, and career assistance in one dashboard.
