Verified Career Opportunities – Project Dataset

Starter dataset for a student platform offering genuine jobs, internships, AI resume analysis, and career assistance.

1. Problem Statement

Students and freshers struggle to find genuine jobs and internships because opportunities are scattered and listings may be outdated, closed, or misleading. They also struggle to tailor their existing resumes to a specific job description, reducing the clarity and relevance of their applications.

2. Solution

Build one trusted platform that lists opportunities from official company career sources, separates Live and Closed opportunities, and provides an AI Resume Analyzer. The user provides an existing resume and a target job description; the system returns an ATS-style match score, recommendations, and a tailored version using only information already present in the resume. It must not invent skills, certifications, projects, education, or experience.

3. Target Users

- College students searching for internships
- Freshers searching for entry-level jobs
- Entry-level job seekers who need help tailoring resumes

4. Core Message

Find genuine opportunities. Build a resume that matches the role. Apply with confidence.

5. Verified Career Opportunities Dataset

Each entry below is based on an official company careers source found during research. 'Program/portal' means the official page confirms the program or opportunity category but does not guarantee a particular opening is currently accepting applications. Current status must be rechecked before your website displays an item as Live.

ID	Type	Company	Role / Opportunity	Location	Status / Notes
GOO-001	Internship	Google	Student Researcher, 2026	Bengaluru, India	Official listing found; deadline shown as June 30, 2026, so treat as Closed no
GOO-002	Internship	Google	Software Engineering PhD Intern, Summer 2026	Bengaluru / Hyderabad + locations	Official Google Careers result; re-check application status.
GOO-003	Internship	Google	Silicon Engineering Intern, PhD, Summer 2026	Bengaluru / Hyderabad + locations	Official Google Careers result; re-check application status.
GOO-004	Job	Google	Silicon Engineer, Platform and Devices, University Graduate, 2026	Bengaluru, India	Official Google Careers search result.
GOO-005	Job	Google	Network Implementation Engineer, University Graduate	Bengaluru, India	Official Google Careers search result.
GOO-006	Job	Google	Network Operations Residency Program, University Graduate, 2026 Start	India	Official Google Careers search result.
IBM-001	Internship	IBM	IBM Internship Programs	India / global	Official program page; see current openings on IBM search.

7. Data Fields for Your Database

• Opportunity_ID

• Type (Job / Internship)

• Company

• Role

• Location

• Eligibility

• Required Skills

• Job Description

• Application Deadline

• Official Application URL

• Official Source

• Verification Status

• Application Status (Live / Closed)

• Last Checked Date

Important Data Rule

Do not hard-code every official opportunity as 'Live'. Your platform should check the official page regularly. If the official page says applications have ended, or the deadline has passed, move the item to Closed. If a specific listing disappears, investigate rather than automatically treating it as fake.
